## Resumen del currículum

Bibiana Serna is an energetic professional with several years of experience designing, implementing, and monitoring Sustainable Development projects in Latin America and the Caribbean. Ms. Serna works for the Department of Sustainable Development of the Organization of American States since 2013. Currently, she serves as a Project Manager Consultant for the Energy and Climate Partnership of The Americas (ECPA), where she supports technical cooperation activities among the OAS Member States. Previously, she led the Program Metrology for Energy and Environment, which strengthened metrology capabilities to support the adoption of renewable energy technologies in the Western Hemisphere. Mr. Serna has a degree in Industrial Engineering from ICESI University of Cali, Colombia, and a Master of Science in Engineering Management from George Washington University. She is fluent in Spanish and English.
